OBJECTIVE

I am pursuing my studies in the field of Artificial Intelligence and Data Science, aiming to use my skills and abilities to benefit society through data-driven solutions. Looking for a fresh task to participate in innovative projects and improve my skills in analysis, programming, problem-solving and adapt more closely with new AI technology.

EDUCATION

V.S.B College of Engineering Technical Campus, Coimbatore (2023–2027)

B.Tech–Artificial Intelligence and Data Science **CGPA:8.43**

Milton Matric Higher Secondary School, Madurai (2022–2023)

Higher Secondary Certificate, Percentage:74.5 %

PROJECT

1.Smart Glass for Blind People

This project is based on IoT and provides Smart Glass for Blind People where we used ultrasonic sensors to detect obstacles in front of them. It uses a microcontroller to process sensor data in order to output real-time audio alerts, creating a new kind of safety and independence that does not rely on cameras.

2.Student Burnout Level Prediction Project

Student burnout levels were predicted using machine learning based on academic and lifestyle factors like study hours, sleep, screen time, and exam pressure. The project used Python for data preprocessing, visualization, and model training with algorithms such as Logistic Regression, Decision Tree, and Random Forest to classify burnout into Low, Medium, and High levels.

KEY SKILLS

- **Language:** Java, Python
- **Web Technologies:** HTML, CSS
- **Database:** MySQL
- **Soft Skills:** Adaptability, Leadership, Teamwork, Quick Learner

INTERNSHIP

Intern – Emglitz Technologies, Coimbatore

(February 2024 – March 2024)

During the IoT internship, I worked on integrating sensors with data collection and cloud-based monitoring systems. I worked with Arduino, Raspberry Pi and MQTT protocols. Working with our team developed my competency in problem solving and bug fixes. The internship provided me greater insight into IoT architecture, real-time analytics, and implementation.

Detail-oriented Data Analytics Intern with a strong foundation in SQL, Python, and Tableau. Experienced in transforming complex datasets into clear, actionable business insights and optimizing data workflows. A collaborative problem-solver eager to leverage analytical skills to drive data-informed decision-making.

CERTIFICATIONS

- Generative AI(Infosys)
- Artificial Intelligence (Infosys)
- Explore machine learning using python (Infosys)

PATENT PUBLICATION

Advanced ad-hoc network security: leveraging AI algorithms for enhanced protection.

DECLARATION

I hereby declare that the above furnished details are correct to the best of my knowledge.
